

Alex Munoz-Craig

Manhattan, NY, 10038 | (401) 602-0728 | bmccraig2007@gmail.com | [LinkedIn](#) | [Github](#) [Website](#)

PROFILE

Computer Science student at Pace University (Seidenberg Scholar) concentrating in Data Science and Robotics, with hands-on experience building machine learning models and data pipelines in Python. Built Weather Vault, a Random Forest-based weather forecasting model and web app, during a project-based AI internship, and previously analyzed sea surface temperature data as a research intern at Brown University. Founder of a new robotics and engineering club at Pace, with a track record of leadership through peer tutoring and orientation programs.

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems

New York, NY

Bachelor of Science (B.S.) in Computer Science | Minor: Mathematics | Minor: Applied Statistics

Expected May 2029

Concentration: Data Science, Robotics | **GPA:** 3.70 | **Cohort:** Seidenberg Scholar

TECHNICAL SKILLS

Dev Tools: JavaScript, Java, HTML/CSS, React, Expo, Git, GitHub, Unity, low code web-builders, streamlit

Data / ML: Python, Pandas, NumPy, scikit-learn, Jupyter Notebook, Matplotlib

ACADEMIC PROJECTS / PERSONAL PROJECTS

Weather Vault – Predictive Weather Model | *AIIE Internship Project*

June 2026

- Built a Random Forest Regressor (scikit-learn) trained on NOAA JFK Airport historical weather data to forecast future temperatures
- Engineered rolling averages (7-day, 30-day) and lag features to capture short- and long-term temperature trends
- Split data chronologically into training/testing sets and evaluated performance using MAE and RMSE
- Diagnosed and fixed a flat, off-season prediction issue by blending model output with historical seasonal averages
- Resolved data-pipeline and deployment issues, including missing monthly data records and backend connectivity

PROFESSIONAL EXPERIENCE

Research & Data Analysis Intern | *Brown University Internship*

July 2024 – August 2024

- Collected and analyzed sea surface temperature datasets for research
- Wrote Python scripts to generate data visualizations and analytical graphs
- Worked with the Department of Earth and Planetary Sciences to present a poster on findings

AI Intern | *AI Innovation & Exploration Intern (AIIE)*

June 2026

- Selected for a competitive, project-based AI and technology development program built around hands-on team collaboration rather than lecture-style training
- Partnered with a peer team to design, build, and iterate on Weather Vault, a working predictive weather forecasting model and web application
- Applied Python, machine learning, and GitHub workflows toward shipping a functioning end-to-end product on a deadline
- Worked cross-functionally with peers to troubleshoot issues and deliver a live demo and final presentation

SAT Prep Student Coordinator, Tutor | *Peer Tutoring*

September 2023 – May 2025

- Aided students one-on-one in math and physics, strengthening analytical and study skills
- Provided a safe, welcoming environment that encouraged students to engage and make mistakes
- Helped improve academic outcomes for students tutored

ACTIVITIES (Pace University)

Founder & President | *Robotics @ Pace*

Summer 2026 – Present

- Founding and working towards building out a new robotics / engineering club on campus, currently gaining momentum after establishing
- Recruiting members and organizing the club's initial structure and project direction

Member | *Seidenberg Scholars Cohort*

Fall 2025 – Present

- Selected as a Seidenberg Scholar within the School of Computer Science and Information Systems
- Voted "Most Valuable New Scholar" by the cohort (Spring 2026)

Freshman Orientation Leader, Peer Leader/Organizer | *Pace University*

Summer 2023 – Summer 2024

- Aided in guiding incoming students throughout orientation and various school activities to prepare them for the transition into college
- Led tours, facilitated group discussions and events, and answered questions from both parents and students
- Encouraged student engagement and provided a welcoming environment
